custom-fit for every requirement!

strawa Friwara Comfort DLE

Advantages

- ✓ Simple installation and maintenance.
- ✓ All components from a single source or in a single station.
- ✓ Convenient option for metering cold water and heat in the living space.
- ✓ Low system temperatures.

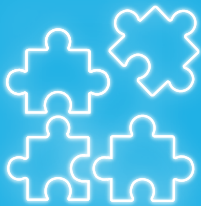

Details

The innovative **strawa Friwara Comfort DLE** heat interface unit enables efficient and full electric water heating - ideal for use in **new builds and renovations**. It offers maximum flexibility as it can be supplied with or without control for underfloor heating systems.

The **4L system** can be used for both heating and cooling, so that the system ensures a pleasant indoor climate all year round.

Thanks to low system temperatures, the unit is particularly **energy-efficient and sustainable**. For quick and easy installation, it is optionally available as a pre-wired solution with strawatherm actuators or EGO adaptive flow controllers.

Variants

- Hot water preparation with cold water metering
- Hot water preparation with cold water metering and heat metering
- Hot water preparation with cold water metering and heat metering, in combination with underfloor heating - regulated or unregulated
